BLISS

RADIANT PERSONAL HEATERS

Think of it as a hot water bottle for the office

Personal comfort control

Be in control of your own personal warmth and comfort at your desk or workstation. BLISS personal heaters provide gentle, radiant heat around your feet, legs and knees where you need it most.

Cost effective heating

It has never before been economically viable to provide individuals with direct control of their personal heating requirements. BLISS heaters cost up to 93% less to operate than conventional heaters. You save money and valuable energy resources.

Natural, efficient, healthy heat

The direct radiant heat from BLISS personal heaters is ideal for sufferers of asthma, allergies and hay fever. You also benefit because the heaters do not produce any fumes or consume oxygen, and are completely silent.

Computer friendly

The non-metallic graphite-carbon heating element within the BLISS heater does not produce an electrostatic charge, ensuring that your computer will run interference free.

Peace of mind

Low operating temperatures, non-flammable components and special inbuilt thermostatic cut-outs ensure that BLISS personal heaters have superior safety advantages over conventional heaters. With a solid metal casing, and no moving parts, you will enjoy trouble free operation. Your BLISS personal heater comes with a 5-year no fuss guarantee.

3 models to suit your exact needs

With 3 models to choose from, you can be sure there is an ideal BLISS personal heater to suit your exact needs and budget.

THD 160 - This model is suitable for individual workstations to keep your feet and legs wonderfully warm.

THD 240 - This model has a 50% higher output which makes it ideal for colder areas where extra heat is needed.

THD 320 - This model is designed for reception desks and larger workstations. The high performance of this 320W heater enables it to also heat areas such as small offices or accommodation rooms.

M O D E L S	W A T T S	D I M E N S I O N S (m m)	A P P R O X C O S T T O R U N
