RADIANT PANEL HEATERS

Heating that hits the spot in every room

Heatstar Radiant Panel Heaters

Heatstar radiant panel heaters are designed to provide economic heating solutions for offices, schools, accommodation, hospitals, and just about anywhere that energy efficient heating is required.

Heat where you need it most

Most heating systems rely on heating space, but not necessarily the people. Heatstar Radiant Panel Heaters concentrate their heat directly to people where it is needed the most. This gentle radiant heat creates a healthy, warm environment.

Energy savings reduce your heating costs

Using hi-tech element technology, Heatstar Radiant Panel Heaters achieve maximum beneficial heat output using minimum energy input. Heatstar can therefore make a significant contribution to reducing your energy costs, wherever they are installed.

Healthy heat reduces allergies & asthma

Heatstar heaters rely on the same qualities as heat from the sun, in that radiant heat is absorbed by the body and does not rely on circulated air. Therefore, dust movement is reduced, creating a much healthier environment for asthma and allergy sufferers. Case studies have proven significant reduction in absenteeism in classrooms fitted with Heatstar heaters. You also benefit because Heatstar heaters do not produce any fumes or consume oxygen, and are completely silent.

Assured safety means peace of mind

Safety is a vital feature of the Heatstar Radiant Panel Heaters, as they operate at relatively low temperatures, do not consume oxygen and are constructed using non-flammable materials. A special thermal safety cut-out is inbuilt into every model.

Maintenance free – trouble Free

The innovative design of Heatstar Radiant Panel Heaters, ensures a long maintenance free life. The heaters contain no moving parts, and the casing is manufactured using 0.8mm zinc steel with a tough baked enamel paint finish.

Simple to install

A variety of installation options are available, for example: ceiling, wall or T-bar mounting; ceiling suspension and portable feet for THD 160 and 240 models.

Ideal for tough security applications

Due to their tough construction and maintenance free operation Heatstar panel heaters are ideal wherever vandal resistant or tamper resistant heaters are required. Heatstar panels are approved for prison applications and are frequently installed in institutions, schools, animal enclosures etc. An optional prison-mounting bracket is available.

MODEL	WATTS	DIMENSIONS(mm)	MOUNTING	APPROX HEATING AREA
THP 750T*	750	1190 X 590 X 30	t-bar ceiling	15 (m ²)
THP 750S†	750	1150 X 590 X 30	ceiling/wall	15 (m ²)
