## RADIANT DISC HEATER

### High Output Radiant Heat

- Caloray is a high intensity heating solution which allows you to enjoy all year, all weather entertaining. It uses an elegant and slimline design that complements and enriches your chosen decor.
- Caloray uses healthy radiant heat utilising efficient electric technology to keep you and your family warm. The no-glow feature of Caloray Disc adds to the ambience of the room in an architectural and stylish manner.
- Caloray is suitable for indoor and outdoor applications & can be used in both residential and commercial installations.

### Heat Performance

- The area that is heated is dependent upon the heater height, ambient temperature, how protected the area is and the number of heaters.
- One of the most effective ways to keep people warm is to ensure an even coverage. It is recommended to heat from two sides as this helps prevent cold spots.
- Caloray has been designed to be used in multiples to cover larger areas.

### Installation

- Caloray is supplied with a lead & plug so can be installed straight into a standard 240v electrical socket if available in the location, thus can be installed by any competent handyman.
- Caloray can be hardwired by a licensed electrician if desired.
- Power & optional thermostat controller must be installed by a licensed electrician.
